

SHERPA

WELCOME TO BASECAMP

Your laundry is about to smell like a five-star hotel.

You just made the best-smelling decision of your week. Here's the 10-minutes-a-week system to get every dollar of it.

1

BOOST — In-wash scent booster

One cap in the wash. This is where scent gets baked into the fabric — the foundation everything else sits on.

2

TOSS — Dryer balls

All three in the dryer. Faster dry time, zero static, and they carry the scent straight through the heat.

3

REFRESH — Fragrance vial

A few drops on a ball between washes. Drawers, closets, gym bags — fresh for weeks.

PICK YOUR FIGHTER

One scent per load. Let each one own the wash — rotate by season, mood, or how much trouble you're in.

ICON

Your daily driver.
Clean, confident,
goes with everything.

ENVY

Going-out scent.
Louder.
Gets noticed.

IRRESISTIBLE

Date night.
Or when you're
in trouble.

3 PRO TIPS — READ THESE

- ✓ Don't over-dry. Heat kills scent — pull clothes just barely dry and let them finish on their own.
- ✓ Re-scent your balls every 4–6 weeks. A few drops on, drawer overnight, good as new.
- ✓ Rinse the balls themselves now and then — clean wool holds scent better than dusty wool.

Smell like you mean it.

Thanks for joining the Basecamp — SHERPA
